Statement on Racial Injustice

June 4, 2020

For those of us who are privileged to serve patients daily, the last several days have served as a searing reminder of the pernicious effects that systemic racism and injustice have on human rights. As members of the medical genetics and genomics community, we are keenly aware of the inequities and prejudice that occur because of perceived differences. During this time of national grief, peaceful protest and reflection, the American Board of Medical Genetics and Genomics stands with the medical community and the community at large as we all work to eliminate racial disparities that underlie inequalities in our society and affect patient care.

Approved by the ABMGG Board of Directors:
